

6 Blade Single Row 4 3/4" - 120mm

Designed for both shallow and deeper wells in the WCSB as a stable, rugged, steerable bit, with consistently high ROP.

The short gauge design helps minimize the bit to bend dimension for use on directional wells.

Utilizes TSD's (Thermally Stable Diamond) on the face and gauge for body protection.

Nozzle placement creates efficient hydraulics and superior cleaning.

Premium P.D.C. cutters for superior longevity.

Specifications

Cutter Density	33-9.5mm Primary Cutters	
Gauge Length	1"	25.4mm
Make Up Length	6"	152.4mm
Total Length	9 1/2"	241.3mm
Number Nozzles	6	
Nozzle Type	6500 Series Adjustable	
Connection	2 7/8" API Regular	
Recommended Flow Rate	100 - 200 GPM	0.4-0.8 m ³ /Min
Recommended Rotary RPM (Lower in Hard Formations)	80-200	
Recommended WOB	2,000-18,000 lbs	890-8,007 daN

Stable, Durable and Directional Friendly...
