

6 Blade Ultra Double Row 11"- 279mm & 12 1/4"- 311mm

Available in 13mm or 16mm Primary Cutters

Designed for both shallow and deeper wells in the WCSB as a stable, rugged, steerable bit, with consistently high ROP.

Can be used in some surface applications as an alternate to TriCone bits.

Utilizes TSD's (Thermally Stable Diamond) on the face and gauge for body protection. Addition of double row cutters provides bit longevity and steering ability in more abrasive formations keeping the hole in gauge.

Nozzle placement creates efficient hydraulics and superior cleaning.

Specifications

Cutter Density	35-16mm Primary Cutters w/ 18-13mm Trimmers	
Gauge Length	2"	50.8mm
Make Up Length	10"	254.0mm
Total Length	14"	355.6mm
Number Nozzles	6	
Nozzle Type	6500 Series Adjustable	
Connection	4 1/2" API Regular	
Recommended Flow Rate	300 - 600 GPM	1.1-2.3 m ³ /Min
Recommended Rotary RPM (Lower in Hard Formations)	60-140	
Recommended WOB	5,000-45,000 lbs	2,224-20,017 daN

Stable, Durable and Directional Friendly...
